

The maximum 'cable extension' is 800M.

For example -

Entry panel 1 to 1083/75 = 10M
 Entry panel 2 to 1083/75 = 10M
 Entry panel 3 to 1083/53 = 10M
 1083/75 to the last 1083/55 distributor = 40M
 1083/55 distributor to handset = 15M (multiplied by eg 40 apartments) = 600M.
 10M + 10M + 10M + 40M + 600M = 670M cable extension.

Cables for electric releases, proximity readers etc are not included in the cable extension calculation.

- NOTES:
- This schematic is for guidance only and should not be used for installation
 - Maximum distance from door entry panel to 1083/75 is 100m using Cat5e cable
 - Maximum distance from 1083/75 to the handset is 125m using Cat5e cable
 - Maximum distance from 1083/55 to the handset is 50m using Cat5e cable
 - Spare cores in Cat5e cable must not be used for other services -
-
- Add a cable for the electric release or maglock -
-
- Add a second Cat5 cable if there is an Urmet/FDI iPassan access control system being fitted -
-
- Cabling for double pole push to exit switch, double pole break glass unit and maglock -
-
- Up to four handsets can be connected to ring together -
-
